EXPERIENCE

User Interface Designer

Coinocracy

Jun 2021 – Present – 7 Months (Remote)

Coinocracy aims to provide the ultimate DAO-VC toolkit to begin to bridge the venture capital and DAO worlds. I focused on designing a DAO-VC formation platform and integrating detailed financial tools like Vesting Contract Tracking.

Front-End Developer

Kernel

Jan 2022 – Present – 1 Month (Remote)

Kernel is building an open, peer-to-peer, lifelong network of awesome humans, one block at a time. I am focused on implementing the ability to connect wallet, and staking DAI in a learn contract from the Kernel website.

Product Design Intern

Modfy

April 2021 – Sep 2021 – 6 Months, Bengaluru (Remote)

Directly collaborated with CEO and Product team to prototype, design and deliver the UI and UX of a web based video editor with a lean design process: research, design, test, and iterate.

ACHIEVEMENTS

Featured in p5.js 2020 Showcase

Generative Identity, a generative art project that makes beautiful abstract patterns out of Names.

2020

IndieFolio – Artist of the Week

Crispy Render, a render series re-imagining existing characters and objects in a cyberpunk style.

September, 2020

EDUCATION

B.Des – Human Centred Design

Srishti Manipal Institute of Art, Design & Technology

2019 – 2023, Bengaluru
